

GALA

The Gala has a firm pulp, crisp and juicy, sweet but slightly sour. Bright red epicarp with a top blush extension of more than 30% of the entire surface and a predominantly striated distribution, smooth, round elongated shape, caliber minimum diameter 65 mm, sugar content exceeding 12° brix, creamy white pulp, crisp and juicy, fine and firm, very fragrant. The Gala apple is harvested in late august or in the first decade of september, to consume a week after harvest, but is possible to conserve it until december.
